

6th November Utkarsh Android Test Build

This build is connected to Utkarsh Publish server.

Uninstall Old Build before installing this build.

Please see below things are in this build.

New Features:

1. Video Issue report button on Custom Video Player
2. Quiz and video issue report admin panel
3. User's phone number will be shown on Custom Video Player in a clockwise manner.
4. When taking screenshot:
 - a. System screenshot:
 - i. Portrait mode: User's phone number will be shown in the top and middle of the screen.
 - ii. In User's gallery an extra file of "null validity" will be generated, since this screenshot was taken by system/os the permissions on this file is different and any editing on that image done by app code, will generate this "null file" from os side.
 - iii. Landscape mode: User's phone number will be shown in the middle of the screen.
 - b. Screenshot by external app:
 - i. Portrait mode: User's phone number will be shown in the top and middle of the screen.
 - ii. In User's gallery there will be no "null file", because this screenshot was not taken by system/os, but was taken by a 3rd party app. So this screenshot file is treated as any other user-level image file.
 - iii. Landscape mode: User's phone number will be shown in the middle of the screen.

Issue Fixes/Optimisations:

1. Fix for issues mentioned regarding Usage History
2. Fix for issues mentioned regarding Show/Hide Books in Library
3. Fix for test generator crashes
4. Optimised Download Video for older android os as well as old phones
5. Optimised loading of Shop

Changes:

1. New Audio icon in Usage History
2. Text change in Show/Hide Books in Library
 - a. Help text in library: "Click icon to hide courses in your library"
 - b. "Show Hidden Courses"

- c. "Show Un-Hidden Courses"
- 3. Only Main Book can be hidden from Library
- 4. Package books cannot be hidden from the Library. -- This is done to keep ambiguous use cases at minimum.

****Note:**

- 1. Issue regarding numerical values in the test generator difficulty level is a server side issue, and will be fixed in the app automatically as soon as the server update happens.
